SUMMARY

- Full-stack developer with hands-on experience building subscription-based and role-driven web applications using React and Next.js, delivering production-ready systems.
- Strong experience in modern frontend and backend development, including React, Node.js, MongoDB, Firebase, and RESTful APIs, with a focus on clean architecture and performance.
- Proven ability to manage client projects end-to-end, learn quickly, and collaborate effectively in team environments.
- I am practicing daily 2 problems of Data Structures and Algorithm on Leetcode.

EDUCATION

St. Francis High School <i>SSC</i>	Malad, Mumbai, IN <i>June 2016- April 2017</i>
Shri Bhausaheb Vartak College of Commerce, Arts and Science <i>HSC</i>	Borivali, Mumbai, IN <i>2018 – April 2019</i>
Shri Bhausaheb Vartak College of Commerce, Arts and Science <i>Bachelor of Commerce</i>	Borivali, Mumbai, IN <i>July 2019 – April 2022</i>
100xDevs <i>Full Stack Developer</i>	Bangalore, IN <i>August 2024 – July 2025</i>

EXPERIENCE

Software Developer Engineer <i>BMG Interiors — Freelance</i>	Feb 2026 – May 2026 <i>Remote</i>
• Designed and deployed a production Next.js website for BMG Interiors, improving their online lead conversion — delivered solo in under 3 weeks from requirement gathering to go-live. • Worked directly with Co-founder to gather requirements and propose solutions. • Managed end-to-end delivery: design, development, deployment. • Improved client conversion and decision making ability by 20 percent.	
Freelance Full Stack Developer <i>Deven Digital Labs</i>	October 2025 – Present <i>Remote</i>
• Built and delivered business websites using Next.js, React, Tailwind CSS. • Worked directly with clients to gather requirements and propose solutions. • Managed end-to-end delivery: design, development, deployment. • Improved client conversion and online presence through UI/UX.	
Data Analyst <i>HUDL, Nesco IT Park</i>	Feb 2024 – June 2024 <i>Goregaon</i>
• Built operational dashboards for lead tracking and pipeline management using data tools, collaborating with senior managers to surface actionable business insights.	

FREELANCE

E-commerce Website Development for AI Subscription Platform | *Next.js, TypeScript, React, Supabase* 2025

- AI Premium Subscription E-commerce Website
- Built a full-stack AI subscription e-commerce platform using Next.js, TypeScript and Supabase — with auth, user dashboard, plan management, and Stripe-ready checkout flow.
- Built the frontend using Next.js and React with TypeScript for scalability, performance, and type safety.
- Implemented authentication, user management, and database operations using Supabase.
- Designed a clean and conversion-focused UI to simplify plan selection and checkout flow.
- Delivered a production-ready codebase for client-managed deployment and future scalability.

E-commerce Business Development and Digital Marketing | *Shopify Development, Meta Ads* September 2025

- LootHunt: Shopify Dropshipping Store Setup
- Built a complete dropshipping website on Shopify platform with custom theme configuration and product catalog setup
- Managed domain registration and web hosting setup for optimal performance and reliability.
- Conducted comprehensive product research and selection to identify profitable niche markets.
- Developed and executed targeted Facebook and Instagram advertising campaigns to drive traffic and conversions.
- Provided ongoing business scaling strategies and performance optimization recommendations.

PROJECTS

CRM System Development for BMG Interiors | *React.js, Next.js, MariaDB* Feb - May 2026

- Developed and enhanced an internal CRM system to streamline client and operations management.
- Designed and implemented responsive frontend interfaces using React.js and Next.js.
- Integrated MariaDB for structured data storage and optimized queries for performance.
- Worked closely with internal stakeholders to refine features and improve usability.
- Improved decision making by 25 percent and leads follow ups by 20 percent.
- GitHub: <https://github.com/deven065/bmginteriors-crm.git>

SocietiQ — Multi-Society SaaS Platform | *React.js, Tailwind CSS, Firebase, Realtime DB* In Active Development

- SocietiQ is a society management platform designed to digitize residential community operations with a mix of free and subscription-based services.
- Provides free core features including gate updates, basic accounting, and maintenance record management for societies.
- Implements role-based access for admins and members with secure authentication using Firebase Authentication.
- Introduced Pro and Advanced subscription plans for additional services and extended management capabilities.
- Admins can manage residents, staff, notices, and service records, while members can access updates and maintenance information.
- GitHub: <https://github.com/deven065/SocietiQ.git>

FlatMate -Single Society Maintenance and Management Web App | *React.js, Tailwind CSS etc* May 2025

- FlatMate is a modern society maintenance and management web application designed to streamline residential community operations.
- The app features role-based authentication (admin/member), secure login/signup with Firebase Authentication, and real-time user role retrieval via Firebase Realtime Database.
- It includes protected routes that ensure only authorized users access admin features.
- Admins can manage member records, expenses, and maintenance payments, while members can view announcements and track their dues.
- Dark mode toggle for improved accessibility.
- GitHub: <https://github.com/deven065/FlatMate.git>

Chef Claude | *HTML, CSS, JavaScript, React, Git, Vercel* November 2024 - December 2024

- Developed a recipe app that generates recipes based on available ingredients using HuggingFace API.
- Integrated AI options through the Hugging Face APIs for personalized recipe suggestions.
- Built with React, focusing on dynamic web development concepts for a seamless user experience.
- Enabled real-time recipe generation, enhancing user engagement and providing practical value.
- Used in real-world scenarios to generate recipes based on available ingredients, demonstrating the practical utility of AI-driven solutions.
