SUMMARY

Java-focused Full Stack Developer and MCA candidate with hands-on experience building client-facing web applications, internal CRM systems, RESTful services, and database-driven solutions. Skilled in Java, Spring Boot, Spring Data JPA, Hibernate, SQL, React.js, and Next.js, with end-to-end experience in requirements analysis, development, testing, deployment, and stakeholder

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS

Backend (Java): Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, REST APIs, Maven

Backend (Node): Node.js, Express.js, REST APIs, Authentication

Frontend: React.js, Next.js, Tailwind CSS, Responsive Web Design

Databases: MySQL, PostgreSQL, MongoDB, Firebase Realtime Database, Supabase

Core CS: Object-Oriented Programming, Data Structures and Algorithms, Collections Framework, Multithreading and Concurrency (basics), Design Patterns, System Design (basics), Microservices Architecture (fundamentals - learning in progress)

Tools: Git, GitHub, Docker, Postman, IntelliJ IDEA, VS Code, Vercel

Testing: JUnit (learning), Manual API Testing

PROFESSIONAL EXPERIENCE

Data Analyst

Feb 2024 – June 2024

HUDL, Nesco IT Park

Goregaon, Mumbai

- Built operational dashboards for lead tracking and pipeline management using data tools and collaborated with senior managers to surface actionable business insights.

FREELANCE

Scalechat - Marketing CRM (Deployment) | CPanel, WHIM Hosting

July 2026

- Scalechat WhatsCRM development and production deployment.
- Node.js, npm, MySQL, Linux VPS, cPanel/WHM and Git.
- Database setup, SQL imports and environment configuration.
- Production troubleshooting and controlled deployments.
- Collaboration with Omkar Pol.
- Safe synchronization between local code, GitHub and the live server

Software Development Engineer

Feb 2026 – May 2026

BMG Interiors | Freelance

Remote

- Designed and deployed a production-ready Next.js website for BMG Interiors, improving online lead conversion and brand presence.
- Delivered the project independently in under 3 weeks, covering requirement gathering, UI development, deployment, and post-launch improvements.
- Worked directly with the Co-founder to understand business requirements, propose technical solutions, and implement website enhancements.
- Managed end-to-end delivery including frontend development, SEO optimization, performance improvements, deployment, and maintenance.
- Improved client conversion and decision-making ability by 20% through better website structure, UI/UX, and lead-focused improvements.

PROJECTS

MyStore - E-Commerce Platform <i>Java, Spring Boot, React.js, MySQL</i>	Active Development
• Building a full-stack e-commerce platform with a Java Spring Boot backend, React.js frontend, and MySQL database. • Developing REST APIs using Spring Boot, Spring Data JPA, and Hibernate following a structured Entity → Repository → Service → Controller architecture. • Implementing user authentication and authorization with Spring Security, including role-based access for CUSTOMER and ADMIN users. • Building product and category management features with DTO-based request/response handling and database persistence. • Implementing secure signup and login workflows with password hashing, credential validation, role management, and structured API responses. • Testing and debugging APIs using Postman while following clean backend development and separation-of-concerns practices.	
Chef Claude <i>HTML, CSS, JavaScript, React, Hugging Face API, Vercel</i>	November 2024 – December 2024
• Developed an AI-powered recipe generation application that generates personalized recipes based on user-provided ingredients. • Integrated the Hugging Face API to generate AI-powered recipe recommendations dynamically. • Built reusable React components and interactive user flows for ingredient input and recipe generation. • Implemented real-time API integration to display generated recipes within the application. • Deployed the application on Vercel with a publicly accessible production environment. • GitHub: https://github.com/deven065/chef-ai.git	

HACKATHON EXPERIENCE

Mumbai Salon Marketplace <i>AI Startup Buildathon 2026, Next.js, React, AI Tools, Vercel</i>	2026
• Registered participant in AI Startup Buildathon 2026 – Beauty Salon Marketplace Challenge, sponsored by SuperXgen AI Builder Series and hosted on UnStop. • Building a startup-style beauty salon marketplace platform for Mumbai with salon discovery, service listings, and booking-focused user flows. • Designing marketplace features including city-based salon search, service browsing, customer journey mapping, responsive UI/UX screens, and conversion-focused navigation. • Using AI-assisted development workflows with tools such as ChatGPT, Figma AI, and Vercel to accelerate product planning, UI design, development, and deployment. • Preparing hackathon deliverables including a live deployed website, GitHub repository, 2–3 minute demo video, and AI workflow explanation.	

EDUCATION

Dr. D. Y. Patil Vidyapeeth, Centre for Online Learning	Pune, IN
<i>Master of Computer Applications (MCA), FinTech Specialization</i>	<i>July 2026 - May 2028 (expected)</i>
100xDevs	Bangalore, IN
<i>Full Stack Development Program</i>	<i>August 2024 – July 2025</i>
Shri Bhausaheb Vartak College of Commerce, Arts and Science	Borivali, Mumbai, IN
<i>Bachelor of Commerce</i>	<i>July 2019 – April 2022</i>
Shri Bhausaheb Vartak College of Commerce, Arts and Science	Borivali, Mumbai, IN
<i>HSC</i>	<i>June 2018 – April 2019</i>
St. Francis High School	Malad, Mumbai, IN
<i>SSC</i>	<i>June 2016 – April 2017</i>
